

ILLINOIS DEPARTMENT  
OF NATURAL RESOURCES  
DIVISION OF FISHERIES

# SPORT FISHING IN ILLINOIS

The purpose of this guide is to help the angler realize more fully the opportunities available for sport fishing in Illinois. All of the Department of Natural Resources fishing areas are included, together with a complete directory of streams and lakes in every county where sport fishing may be enjoyed.

In order to acquaint everyone with the most important fish to be found in Illinois waters, thirty-one illustrations are presented with detailed descriptions to aid in identification of the species to be encountered.

Daily catch records obtained from census of angler success also reveal that nearly 90 percent of those who fish either catch only a few fish or no fish at all. This lack of success is caused by a lack of "know how" among fishermen — either in selecting the spots to fish, or in methods of luring the fish. To become proficient in any endeavor it is necessary to expend a great deal of effort. This is definitely the case in fishing, for in almost every instance, it has been found that the angler who repeatedly comes home with limit catches or large fish invariably spends long hours at the sport, fishes several times each week and has learned the best locations for good fishing, the best time of day to fish and type of bait or baits most often successful.

The fisheries program of the Department of Natural Resources is designed to provide more and better opportunities for fishing, and insofar as possible, assist the angler in locating the right places where fish can be caught.

Illinois has over 1.6 million acres of surface waters. Nearly two-thirds of this acreage is contained in the Illinois portion of Lake Michigan (976,640 acres). Approximately 26,440 miles of rivers and streams (325,000 acres) are found throughout the state. These streams are classified by width categories as follows:

5-30 feet wide	20,000 miles	43,200 acres
31-100 feet wide	3,900 miles	26,200 acres
101-300 feet wide	1,030 miles	18,000 acres
301 plus feet wide	1,513 miles	237,600 acres

The three largest man-made lakes in Illinois were constructed by the U.S. Army Corps of Engineers. These reservoirs total 54,580 acres and are composed of:

Carlyle Lake	24,580 acres
Lake Shelbyville	11,100 acres
Rend Lake	18,900 acres

Illinois has 88,414 impoundments covering 256,619 acres. Of these, 3,084 are classified as lakes of six acres or more in size. The remainder (85,330) are classified as ponds. Impoundments may be grouped by ownership categories as follows:

State Owned	472 impoundments	39,839 acres
Publicly Owned	734 impoundments	79,277 acres
Privately Owned	87,208 impoundments	137,503 acres

Over 90% of the state's surface water acreage (1.4 million acres) is open to public fishing. Privately owned waters, however, are under the control of the owner and permission must be granted in order to fish these areas.

The fishing areas described herein as available to the public were provided by Illinois Department of Natural Resources Fishery Biologists. These water areas consist of both public and private ownership and the future status of allowign public usage is at the discretion of the controlling authority, and not necessarily the Department of Natural Resources.

A special note is made in regard to stream fishing. **MOST STREAMS ARE IN PRIVATE OWNERSHIP** and the only available public access is at bridge crossings and along public right-of-ways. In case of doubt, inquire and request permission for access in order to prevent any undesirable or embarrassing situations from arising

## ACKNOWLEDGMENTS

Most of the drawings of fish were taken with permission from the book "Iowa Fish and Fishing" by James Harlan and Everett Speaker, published by the Iowa Conservation Commission. The data on the fishing waters were collected by Department of Natural Resources Fishery Biologists.

The Illinois Department of Natural Resources receives Federal financial assistance and therefore must comply with the federal anti-discrimination laws. In compliance with the Illinois Human Rights Act, the Illinois Constitution, Title VI of the 1964 Civil Rights Act, Section 504 of the Rehabilitation Act of 1973 as amended, and the U.S. Constitution, the Illinois Department of Natural Resources does not discriminate on the basis of race, color, sex, national origin, age, or disability. If you believe you have been discriminated against in any program, activity, or facility please contact the Equal Employment Opportunity Officer, Department of Natural Resources, 524 S. Second St., Springfield, IL 62701-1787; (217) 782-7616 or the Office of Human Resources, U.S. Fish & Wildlife Service, Washington, D.C. 20240
